OCDS Validation Report

OCDS publisher: GACM (Mexico Airport) **for dataset:** contract.json

Produced February 2016

Authors:
Edafe Onerhime
data@open-contracting.org

About this Report

This report has been produced by the Open Contracting Partnership for GACM (Mexico Airport) through its OCDS Data Standard Helpdesk staffed by Open Data Services. Its purpose is to provide feedback on the validation of the datasets from contract.json against the Open Contracting Data Standard.

About the Data

The dataset was checked on Friday, 04 March 2015 using the OCDS Data Validator and is available here.

What We Found & Recommendations

We evaluated a release dated 23 June 2015. The releases did not validate against the OCDS schema. We forked the file on github and provided a copy of the changes we recommend below can be found here. A copy of the OCDS validation after we applied the fixes is here until 14 February 2016.

Here's a summary of what we found and fixes we applied:

Release

> tag: `Contrato` is not part of the closed codelist. Replaced this with `contract`.

Tender

> tenderers: is expecting an array of entities who submitted a tender. Looking at this a little closer, it appears that `numberOfTenderers` is an existing field which can be moved up to the tender level. `numberOfInhabilitatedTenderers` is not currently part of the standard, so it was added to the same level as `numberOfTenderers`. It's worth proposing an extension by adding an issue to the github repository and explaining what this field represents within your data.

> documents: id not provided for `"supportDocument": "Acta de visita al sitio de realización de los trabajos publicada en CompraNet el 29 de junio de 2015"` - Added PO-006E00034-N001-2015 to meet the requirement.

> value: The amount should be a number but appears to be a range of numbers split by year: http://standard.open-contracting.org/latest/en/schema/reference/#value. Instead of "TOTAL: $150,000,000.00 2015: $100,000,000.00 2016: $50,000,000.00", used the total amount 150000000.00. It is worth discussing how to model the yearly amounts, please review this issue as a starting point. The same text is used in budget value amount and should be reviewed.

> minAmount "No aplica" was replaced by null.

> **Items**
>
> > `quantity` is given as a string ("1") instead of integer (1) - this may be an issue on other number fields and is worth reviewing.

Milestones

> status: "No se han recibido estimaciones por parte del contratista" is not part of the closed codelist. Removed this field.

Eligibility Critieria: This has been provided multiple times. There is the expected criteria as string: "elgibilityCriteria": "Capítulo VI de la Convocatoria (ver anexo)",

There is also an object:
    "eligibilityCriteria": {
    "criteria": "Convocatoria a la Licitación Pública Nacional Presencial LO-009KDH999-N50-2015 para los trabajos relativos a la construcción del drenaje pluvial temporal del Nuevo Aeropuerto Internacional de la Ciudad de México publicada en CompraNet el 23 de junio de 2015",
    "uri": "/datos_abiertos/pdf/Campamento/LO-009KDH999-N47-2015_Requisitos.pdf"
    }

It appears that the second `eligibilityCriteria`, `biddingDocuments`, `technicalSpecifications`, `evaluationCriteria`, `clarifications`, `shortlistedFirms` and `conflictOfInterest` should be [tender documents](#).

Awards

Items
For "id": "62501001":
    `classification` is a string - this should be an [object](#).
    `unit` is 1, it should be an [object](#)

Award Status
`Adjudicado` is not part of the [closed codelist](#). Replaced this with `active`.

Contracts
Contract Status: `Activo` is not part of the [closed codelist](#). Replaced this with `active`.

Dates
Tender Enquiry Period and Tender Period - Start Date and End Date: `07/02/2015, 07/10/2015, 07/27/2015` are not [formatted as dates](#). Replaced with `2015-07-02T00:00:00Z, 2015-07-10T00:00:00Z` and `2015-07-27T00:00:00Z` respectively. All dates should follow the linked to format.

In Milestones section, changed the `modificationDate startDate 06/29/2015` and replaced this text "No se han recibido estimaciones por parte del contratista" in `date StartDate` with null. There were a number of other dates with text in them replaced with null.
